

GROWING DATA FOR IMPACT

Unlock **huge potential** from your data.

OUR CORE TECH:

We Transform Big Data into Powerful Insights: Our agronomy ontologies engine, Axiom is the technology engine for all your data. Axiom transforms volumes of raw agricultural production outputs into knowledge. We do this via ontologies that unite and connect vast amounts of raw data into a knowledge graph database that you can easily search, access and consume to unlock those deeper insights.

- ✓ Boost research with powerful data
- ✓ Increase analysis productivity
- ✓ Speed time to insights
- ✓ Cultivate data-driven crop models
- ✓ Quantify carbon emissions with crop nutritional protocols
- ✓ Gain operational effectiveness with data-driven insights for R&D and Sales

OUR SOLUTIONS:

Agronomic Trial Management: Run and analyze field trials with full visibility and control.

Insights & Models: Run analysis, generate crop models and other discoveries.

Legacy Data Fusion: Use data standardization and enrichment to integrate and cross-analyze your data.

Agmatix Mobile App: Accurate data collection and analysis. Easily run on-farm experiments in just a few clicks.

Digital Crop Advisor: Increase yield, boost sales and measure sustainability.

CONNECTING AGRONOMIC DATA TO ACTIONABLE INSIGHTS IN 4 STEPS:

1. Trial Management & Insights | Optimize & Streamline R&D

2. Agmatix App | Flexible Field-Level Data Collection

3. Digital Crop Advisor | Data-Driven Crop Nutrition Advice

4. Legacy Data Fusion | Extract More Insights From Your Data

WE GROW DATA FOR IMPACT:

50M+ for **150+**
