

User Story:

As journal staff for PedsOS (AAP), I want to have a user role named 'Deputy Editor' for BP implementation so that Deputy Editor user can access & action on the tasks relevant to him/her.

Requirements

I will know this is done when:

- 1) For AAP's PedsOS journal, I want to add a new role with the following details
 - a) Role name is 'Deputy Editor'
 - b) The permissions/queues will be similar to that of 'EiC' role.
 - c) Queue names & task names need to be updated to replace Editor in Chief (EiC) with 'Deputy Editor'.

Implementation Notes:

- Please maintain alignments & fonts
