

מכון טכנולוגי חולון Holon Institute of Technology

Points of Pride

In the 50 years since its founding, HIT's evolution has reflected and played a vital role in Israel's remarkable transformation from fledgling nation into the technological powerhouse it is today.

Like its sister institutions of higher education, it has always sought to develop **CREATIVE** academic programs which aspire toward the highest standards of academic excellence – but which also meet the rapidly-changing needs of Israeli society.....

With a strong foothold in the world of hi-tech, defense and industry of all types, it has sought to inspire our students and faculty to provide **INNOVATIVE** solutions to real-life needs

– whether in solar energy, mass emergencies or assistive design and engineering.

And.....it has been **BOLD** in thinking out of the box, daring to challenge existing norms and conventions, in order to create an academic and scientific experience that is new and unique.

HIT is not just the “best in its class” – its accomplishments and caliber far exceed the ‘expected’ – its’ story reflects the development of the modern State of Israel’s where ‘less’ can achieve ‘more’ when there is determination and will.... And where today’s advances in technology and design can converge to create a better tomorrow.

We are proud of who we are, and what we have achieved

- **Rigorous research** and highest level academics are part of our very DNA.

Standards forged throughout our 30 year association with Tel Aviv University

- Our **5 faculties** in Engineering, Design, Management Technology, Instructional Technology and Science provide a meaningful home for almost **4,500 students** seeking their Bachelors and Masters Degrees.

HIT's 4 year graduation cycle of 1,000 engineers make up one quarter (25%) of the entire electrical engineer work force in Israel

- We have developed **unique academic programs** and initiatives.

We are the only institution of higher education which has a Faculty of Instructional Technology

- Our campus is **diverse and multicultural** and embraces 'the other'.

We are a central meeting place for students from around Israel, from Druze in the North & Bedouin in the South, from Ethiopians to Ultra-Orthodox

- We have made higher education **accessible** to all through our Flexi-Study programs.

Our campus – classrooms, laboratories and studios - is active day and night, from 7 am to 10 pm, providing educational opportunities for over 2000 students

- The **international outreach** of HIT is far-reaching, with 90 active international collaborations, student exchange and faculty mobility programs from 35 different countries.

We were chosen by the Council for Higher Education to demonstrate "best practices" in creating and sustaining the EU's Erasmus collaborations to our fellow institutions of higher education

- We provide a **multidisciplinary team experience** which cross-fertilizes ideas and encourages unconventional solutions to real-life problems.

We call this "Prac-acemics", with team and leadership-building key skills a major priority

- Our **15,000 alumni** are highly employable, and contribute significantly to Israel's technological prowess in all sectors.

HIT alumni enjoy a 90% employability rate. From Elbit to Intel, HIT alum are there, in the center of the action!

For over 5 decades, HIT has led the way in creating a seamless and unparalleled synergy between technological and design education – harnessing them to the betterment of society and humanity.
