Interests

- recreational writing, especially for the family
- researching family roots, ancestry
- recreational reading, book club member

Education and Qualifications

- Bachelor of Arts** Sep 1978 - Jun 1981
University of Wisconsin, Madison, Wisconsin
Major: Biochemistry
- Ph.D.** Sep 1981 - Jul 1988
Johns Hopkins University, Baltimore, Maryland
Major: Biochemistry
Thesis: Somatic Mutation of Antibody Genes

I have over 30 years experience in scientific reading, writing, and editing (see selected publications). As a hobby I took a writing course from the Institute of Children's Literature, after which I wrote a number of science articles for children's magazines. In addition I have written several compositions for my family including a recipe book and recollections of my parents and grandparents. I am fluent in hebrew, having lived in Israel as a child for 3 years and now as an adult for over 20 years. I translated a children's' book from hebrew to english (תריסים ירוקים פתוחים Open Green Shutters, by Ronit Levinshtein-Malz) as a family project. I also enjoy editing, am a stickler for using correct grammar and being as concise as possible. I think I could be good editor and would like to try doing so professionally.

Work experience

- Senior Research Associate** Aug 1998 - Present
The Rappaport Institute, Israel Institute of Technology, Haifa, ISRAEL
General Job description: Conduct basic science research in the fields of cardiovascular biology and diabetes and neurodevelopmental disorders
