Career Objective

I have been running my own translation and editing business for the last several years, serving the academic community as well as businesses and corporations. I have also been making calls to the US for Acsia Partners, setting up times for company sales staff to call back and discuss voluntary employee long-term care benefit programs. For references call Dan Cahn 425-351-2015 Dan is a company vice president and one of its founders.

Previous to that and for several years, I worked as a quality assurance manager and as a consultant for the hi-tech and plastics industries. As quality manager, one of my main functions has been the introduction of ISO requirements to industries ranging upwards in size to 500 employees. I have also worked with companies in the medical industry and have audited GMP practices and prepared for outside audits. The companies that I have worked with have produced the following products: sterilized tubing and drains, sterilization pouches for medical equipment, diamond headed tools, antennas for cellular phones.

I also have experience in managing the development of a two thousand acre banana project in Central America, including packing facilities, irrigation, drainage ditches and workers' housing. In addition, I managed a meatpacking plant and cattle and citrus operation.

Other experience includes teaching at the university level, courses in statistics, and the social sciences

Work Experience:

Managing director of Rosenfeld Translation Services, Yavneel
From: February 1998 to the present

Quality Assurance Consultant, Quality Consultants
From: January, 1995 to: Present

Worked with several companies as a consultant in preparing them for ongoing government ISO audits and performing required corrections of procedures. I have also introduced ISO practices to companies that have not previously functioned in that capacity.

Quality Assurance Manager, Galtronics Ltd.
From: August, 1990 To: January, 1995

Introduced ISO procedures and standards to a company of 500

employees that manufactures antennas for cellular telephones and markets its products worldwide. Also successfully introduced and maintained a process control system based on the Motorola Six Sigma program and introduced and maintained statistical process controls into the manufacturing process. Reduced percentage of defects from 5% to less than 1% in a two year period. Many production lines were successful in producing 0% defective product. Introduced a program of training and development in the principles of quality assurance and statistical process control. Introduced Total Quality Management throughout the plant.

Adjunct Professor, Union Institute - Cincinnati Ohio

From: September, 1983 To: August, 1990

Taught several courses in statistics, psychology, sociology, and urban planning

Academic Achievement:

M.A., University of Cincinnati
