

Neji Hasni

Professional Summary

Once, the writer Cora Coralina said: “Recreate your life, always, always. Remove the stones, plant rose bushes and make sweets. Begin again,” Neji Hasni has literally followed this saying to manage his life’s change. Tenacious, with presence, intellectual, leader, developer, achiever, technologically conscious, and goal-driven senior researcher, Neji approaches each task challenge with his intrinsic flair for innovation, creative problem-solving and measured risk-taking to drive consistent bottom-line improvements.

Neji began his career on a path that is rare among other ITC decision makers. His goal was to boost his knowledge with a strong foundation in technology. The best way to do so, was to excell in earning a PhD and (03) Master of Science degrees without mentioning the certifications.

As a professional, Neji demonstrated an irrevocable poly-expertise in his 34 years of working experience. Recognized as a high-potential executive, in 2018, his company, Nifty and Adhoc Service Advisory (NASA), was chosen by GHP International Life Sciences Awards Committee as the Best Specialist ICT & Holistic Security Advisory - North Africa. Besides, he was invited, twice, as distinguished speaker at the Healthcare and Technologies Conference 2016 in London, UK and 2018 at Dublin, Ireland. Besides, Neji is a reviewer for the benefit of USRA, IEEE Com Magazine, Enago, ATINAR, SAI, and more 10 other.
