4.4 Grading scheme and grade distribution guidance:

KOU official grading system uses scores between 0 and 100. Passing grades range between 50 and 100. Below 50 (grade F) is failing. The lettered grades, coefficients and grade intervals are the following:

Letter	Coefficient	Grade interval (Out of 100)	Explanation
A	4.00	95-100	Excellent
B	3.50	83 - 94	Very Good
C	3.00	68 - 82	Good
D	2.50	55 - 67	Satisfactory
E	2.00	50 - 54	Sufficient
F	0.00	0 - 49	Fail

The grade (V) is given to the students who do not fulfill the requirements of minimum attendance to lectures of which they are registered for the first time. Students must attend minimum 70% of theoretical part of the lectures and if available 80% of laboratory and practical sessions.

With the condition of final exam grade being minimum 50 out of 100, a student's success grade is determined by the sum of 40% of mid term grade and 60% of final grade.

4.5 Overall classification of the qualification (in original language):

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The basic structure of the Turkish National Education system consists of four main stages as pre-school education, primary education, secondary education and higher education.

Pre-school education consists of non-compulsory programmes whereas primary education is a compulsory 8 year programme for all children beginning from the age of 6. The secondary education system includes "General High Schools" and "Vocational and Technical High Schools".

Higher education is defined as all post-secondary programmes with a duration of at least two years. The system consists of universities (state and foundation) and non-university institutions of higher education (police and military academies and colleges). Each university consists of faculties and four-year schools offering first cycle programmes, the latter with a vocational emphasis, and two year vocational higher schools offering pre-bachelor's (associate's) level programmes of a strictly vocational nature.

The establishment of all universities is based on Law No. 2547, the Law on Higher Education. All programmes of higher education require accreditation by the Council of Higher education, prior to the establishment.

Admission to higher education is based on a nation-wide Student Selection Examination (ÖSS). The examination is held once a year and is administered by the Student Selection and Placement Center (ÖSYM). Candidates gain access to institutions of higher education based on their composite scores consisting of the scores on the selection examination and their high school grade point averages.

Graduate-level programs consist of master's and doctoral programmes, coordinated by graduate schools. Master's programmes are specified as programmes "with thesis" or "without thesis". Programmes "without thesis" require completion of more graduate courses and a term project. The duration of these programmes is a minimum of two years. In general, access to doctoral programmes requires a master's degree, unless the students' performance at first cycle degree is evaluated as exceptionally well. Doctoral programmes have a duration of a minimum of four years which consists of completion of courses, passing a doctoral qualifying examination, and preparing and defending a doctoral dissertation. Medical specialisation programmes are equivalent to doctoral level programmes and carried out within the faculties of medical schools with hospitals.

The Higher Education System is regulated by the Council of Higher Education (Yüksek Öğretim Kurulu-YÖK). Established in 1981, the Council regulates the activities of higher education institutions with respect to research, governing, planning and organisation.
